## RENEWED FIRMNESS

RENEWED FIRMNESS
IN COTTON VALUES

New York, Dec. 4.—The cotton market showed renewed firmness during today's carly trading. The opening was steady at an advance of 5878 points, and before the end of the first hour active months had sold some 62983 points above fast night's closing, which reflected further commission-house buying promoted by builtsh spot advices, confirmation of recent reports that the raitroads would resume the issuance of things, Dec. 4.—Butter, unchanged, at an advance of 54740 points, and before the end of the first hour active months had sold some 62953 points above last night's closing, which reflected further commission-house buying promoted by buillsh spot advices, confirmation of recent reports that the railroads vould reaume the issuance of through bills of lading, and recent crop estimates suggesting a yield under the government indication, it seemed also that aimited buying orders from the trade had been raised to meet the market, but around 25-42c for January and 25-48c for March there was enough realizing to cause some irregularity and moderate reactions.

Rumors that foreign governments were in the domestic markets for certain lines of cotton goods probably helped the early advance, but there was no general or aggressive buying and the market was very quiet late in the morning. January sold off from 26-42c to 25-29c under realizing, with the midday market holding steady at the reactions of some 20625 points from the best.
